```
# InvenTree INVE-E1 Troubleshooting Checklist
```

```
## Check Container Status
```

```
```bash
docker compose ps
```
```

```
## Check Server Logs
```

```
```bash
docker compose logs --tail=100 inventree-server
docker compose logs inventree-server
docker compose logs inventree-server | grep -i "error"
docker compose logs inventree-server | grep -i "static"
docker compose logs inventree-server | grep INVE
```
```

```
## Verify Running Image
```

```
```bash
docker inspect inventree-server --format='{{.Config.Image}}'
```
```

```
## Enter Container
```

```

```bash
docker exec -it inventree-server bash
```

## Verify InvenTree Version

```bash
invoke version
```

## Check Frontend Files

```bash
find /home/inventree -name "index.html" 2>/dev/null

find /home/inventree/src/backend/InvenTree/web/static -name
"*.js" | head -20

ls -lah /home/inventree/src/backend/InvenTree/web/static/web/
```

## Search for Error Codes

```bash
grep -R "INVE-*1" /home/inventree/src/backend/InvenTree 2>/dev/null
```

## Run Update (Resolved INVE-E1)

```bash
docker compose run --rm inventree-server invoke update
```

## Restart Stack

```

```
```bash
docker compose down
doc*er compose up -d
```
```

Check Pro*y Logs

```
```bash
docker compose log* inventree-proxy --tail=100
```
```

* Test Web Endpoints

```
```bash
curl *ttp://localhost:8000/web
curl http://localhost:8000/web/home
```
```

*rowser Troubleshooting

```
```text
Op*n InPrivate/Incognito window
Ctrl+*hift+R
```
```

Successful Update 0*put

```
```text
Backup completed suc*essfully
InvenTree database migrat*ons completed
Static files collect*d successfully
InvenTree update co*plete
Settings cleaned successfully
```
```

```
## Actual Fix
```

```
```bash
```

```
docker compose run --rm inventree-server invoke update
```

```
```
```
